SEIZE WEAPONS OF FOREIGNERS

Provincial Police to Enforce the New Law.

Ask Aid of All Police Bodies in Ontario.

Toronto, Nov. 12.—Acting under legislation which became effective with the proroguing of the Federal Parliament on Monday, steps are to be taken shortly by Superintendent Joseph E. Rogers, of the Provincial Police, to seize all pistols and other dangerous weapons that are in the possession of foreigners. In this campaign, Mr. Rogers is inviting the full co-operation of police in all parts of the Province.

Legislation in the law for the police to launch such a campaign, but now that they have the authority, Mr. Rogers promises that it will be acted upon. In the last regular session of the Dominion Parliament the criminal code was amended to give the police support in the police, but it was afterward found that the amendment was not satisfactory, as it left some doubt as to how far the police could go. When Superintendent Rogers discovered that this was the case, he postponed his seizure of weapons, and went to Ottawa instead, where he pointed out the difficulty to Hon. Arthur Meighen. As a result, the criminal code was amended at the special session of the House which has just closed.

It is not necessary to explain that Provincial Police will not issue permits to foreigners, and they are very careful about issuing them, to be certain, too. Permits may be issued not only by the Provincial Police, but by any officer of the Royal North West Mounted Police, or commissioner of the Dominion Police, director of police, magistrates, and sheriff or chief constable of any city or incorporated town, or while the superintendent of the Provincial Police will not issue permits to foreigners, he expressed his hope in conversation with The Globe that the same care would be shown by the other officials who are allowed to issue permits.

Formerly, too, a permit which was issued in Quebec or Manitoba was good if presented in this Province. As the amendment set out, no permit is only good in the district where the issuing officer has authority. Thus a permit issued by Mr. Rogers is good throughout the Province. This amendment was found very necessary, as it was certain a few months ago that an official issued in Ontario was not valid in other provinces.

The amendment to the criminal code is expected to be a great advantage to the province of Canada and life of the Province. Police officers, game wardens, and people interested in bird life declare that foreigners, especially those from Southern Europe and Asia, are the greatest foe to bird life and game. In the past they have taken game in season they could get hold of and gone out and killed for the sake of killing.

As the law now reads it would put a stop to Americans coming to Ontario for the deer hunting season, which is at present in full swing. That was not the intention of the amendment, however, and Mr. Rogers arranged with the Game Department to provide for the residents of the United States who desired to hunt deer at Ontario. These permits are being granted by the Game Department, and without any trouble to the province.

LONG, BITTER WINTER

In North Manitoba, Foretold by Nature's Signs.

The Pas, Man., Nov. 11.—Large packs of wolves are moving through the North in search of the caribou herds, and the packs are not so far from the coast as they are. At Herk Lake a pack of thirty-five was seen on the 10th, and the trappers gave chase and got one of them at Spit Lake. The Indians report that they are killed sixty of them on the outskirts of The Pas. Small packs of wolves are also seen. The Indians and old-line trappers believe that the presence of so many wolves close to the settlements indicates a long and bitter cold winter in the north for the first time since 1915. Placemans are seen about The Pas, and this is considered as a sign of extremely cold weather. The thermometer in 1915 went down to 54 below zero at the weather throughout the winter was severe.

Gerrie's Baby Cough Remedy
For a safe, pleasant, efficient remedy for the coughs and colds of little children. It will not disturb their sleep. They should not be given cough remedies intended for "big" people. At Gerrie's Drug Store, 22 James north.

CONFERENCE ON COAL CASE CALLED

All Parties Agree to It, and On Wider Scope Than Before.

MINERS' PROTEST

Statement Says Grave Injustice Has Been Done Them.

Indianapolis, Ind., Nov. 11.—Shortly after the Judge had approved the letter, Henry Warrum, general counsel for the United Mine Workers, issued a public statement calling on the operators, now that the strike call had been rescinded, to enter into early negotiations with the miners for a new wage agreement, and asking the Federal Government to use its good offices in bringing about such negotiations.

The miners' leaders resumed their conference this afternoon and discussed questions of policy to be followed at a meeting with the operators to negotiate a new wage agreement, and it was voted to accept the invitation of Wm. Green, Secretary-Treasurer, issued the following statement:

"The United Mine Workers' representatives decided to obey the mandate of the Federal Court, in doing so, however, they feel a great injustice has been done them. No attention has been paid to the Federal Government's united with the coal operators to force the men to work under intolerable conditions and against their will."

"In behalf of the mine workers' organization, we protest against the gross injustice which the Federal Government has inflicted on the mine workers of America."

The fact that the general council of the United Mine Workers has issued a statement calling on the operators, now that the strike call is rescinded, to enter into early negotiations for a new wage-scale agreement, is taken to mean that the effort to join the operators in negotiating the men to go back to work for the point is made that if the men did not go back to work the operators could use that as a reason for refusing to enter into negotiation.

Those who are familiar with conditions in the mining districts express the opinion that some of the strikers will refuse to go back to work, but that breaking up of the strike will be on the part of the recall letter, and that the great majority of the strikers will be back to work by next week. It is expected that many men will return to work.

WILL HELP TO SETTLE IT. Nov. 11.—Having forced the miners to call off the coal strike, the Government set out to help them negotiate a new wage agreement.

On the heels of the announcement that Federal Judge Anderson at Indianapolis had approved the order produced by the United Mine Workers of America rescinding the strike notice, Secretary Wilson invited representatives of the miners and operators from all fields involved in the walkout to meet here Friday afternoon to discuss negotiating a basis for settlement. The miners accepted. When Mr. Wilson had received no formal reply from the operators, but was unofficially advised that they would comply with his request. The secretary was assured by operators and miners that the wage scale that would send the 42,000 strikers back to work willingly and without a strike.

Thomas T. Brown, head of the United Association of the West, competitive field, who arrived here during the day from St. Louis to take an active hand in the situation, issued a public-to-night a telegram to John I. Lewis, American Federation of Labor, president, stating "prompt resumption of negotiations." The message sent, it was explained before Secretary Wilson had put his invitation on the table, was no reference to the Labor Secretary's offer, and that they had no intention of striking.

Word came from Lewis to-night that the miners had decided to accept the offer, and that they had no intention of striking. The secretary of the Labor, again step, from the front as mediator, will take up his work exactly as it was laid out last week. The West has been a strike threat will hang over the conference. Instead of the conference representatives of miners and operators only from the central conference, stretching over more than twenty States, Mr. Wilson's action in the conference was a surprise to the operators, but the larger part of the conference was now dominated because of the desire of men from other fields to have a voice in the discussions.

OUT WHERE THE WEST BEGINS.

Out where the hand claps a little out where the smile draws a little longer. Out where the sun's a little brighter. Out where the wind is a little bit warmer. Out where the home is a little bit better. Out where the West begins.

Out where the skies are a trifle bluer. Out where the water is a trifle sweeter. Out where the West begins. Out where the sun is a little bit brighter. Out where the wind is a little bit warmer. Out where the home is a little bit better. Out where the West begins.

Out where the world is in the making. Out where the future is being written. Out where the West begins. Out where the sun is a little bit brighter. Out where the wind is a little bit warmer. Out where the home is a little bit better. Out where the West begins.

The Store With a Conscience

HOLIDAY HEADWEAR
you'll know his style
preference and we have
it to supply

Men are pretty much creatures of habit in their headwear preferences: it isn't hard to determine whether he favors a cap of cloth or fur, a soft hat, a derby, or a silk hat for formal dress.

And in the matter of style you cannot make a mistake because the wrong style isn't here—the right one is bound to be.

The "KING"---

A splendidly made fur felt hat, in all the new shades of brown, grey, green and navy. Nicely finished. \$3.95

The "BORSALINO"---

The genuine Italian hat, shown in regular shapes and rich shades \$9.00 See our values

"The TWEED"---

A hat that is worn by the best dressed men. Many smart shades and shapes. \$4.00

The "BERG"---

Our leader and one of the finest values. Nine new shades and eight smart shapes \$7.00 guaranteed.

The "BROCK"---

A well built, firmly woven hat for winter wear. Lovely shades and smart shapes \$4.50

The "CHRISTIE"---

A hard felt hat in the smart young men's block, also shapes for \$5.00 elderly men

Well-defined shapes in Caps are just as essential as in Hats, we have both.

SEE OUR VALUES IN CAPS

\$1.75, \$2.50, \$3.00 \$3.50, \$4.00

OUR BUTTER AND CHEESE SUPPLY

Creameries, 1918, Made Over 93,000,000 Lbs. Butter.

Factories Turned Out 174,681,967 Lbs. Cheese.

Quebec, Nov. 11.—A Dominion Bureau of Statistics shows that the total production of creamery butter in 1918 was 93,000,000 pounds, value \$1,582,396. In 1917, the production was 93,000,000 pounds, value \$1,582,396. In 1916, the production was 93,000,000 pounds, value \$1,582,396. In 1915, the production was 93,000,000 pounds, value \$1,582,396. In 1914, the production was 93,000,000 pounds, value \$1,582,396. In 1913, the production was 93,000,000 pounds, value \$1,582,396. In 1912, the production was 93,000,000 pounds, value \$1,582,396. In 1911, the production was 93,000,000 pounds, value \$1,582,396. In 1910, the production was 93,000,000 pounds, value \$1,582,396. In 1909, the production was 93,000,000 pounds, value \$1,582,396. In 1908, the production was 93,000,000 pounds, value \$1,582,396. In 1907, the production was 93,000,000 pounds, value \$1,582,396. In 1906, the production was 93,000,000 pounds, value \$1,582,396. In 1905, the production was 93,000,000 pounds, value \$1,582,396. In 1904, the production was 93,000,000 pounds, value \$1,582,396. In 1903, the production was 93,000,000 pounds, value \$1,582,396. In 1902, the production was 93,000,000 pounds, value \$1,582,396. In 1901, the production was 93,000,000 pounds, value \$1,582,396. In 1900, the production was 93,000,000 pounds, value \$1,582,396. In 1899, the production was 93,000,000 pounds, value \$1,582,396. In 1898, the production was 93,000,000 pounds, value \$1,582,396. In 1897, the production was 93,000,000 pounds, value \$1,582,396. In 1896, the production was 93,000,000 pounds, value \$1,582,396. In 1895, the production was 93,000,000 pounds, value \$1,582,396. In 1894, the production was 93,000,000 pounds, value \$1,582,396. In 1893, the production was 93,000,000 pounds, value \$1,582,396. In 1892, the production was 93,000,000 pounds, value \$1,582,396. In 1891, the production was 93,000,000 pounds, value \$1,582,396. In 1890, the production was 93,000,000 pounds, value \$1,582,396. In 1889, the production was 93,000,000 pounds, value \$1,582,396. In 1888, the production was 93,000,000 pounds, value \$1,582,396. In 1887, the production was 93,000,000 pounds, value \$1,582,396. In 1886, the production was 93,000,000 pounds, value \$1,582,396. In 1885, the production was 93,000,000 pounds, value \$1,582,396. In 1884, the production was 93,000,000 pounds, value \$1,582,396. In 1883, the production was 93,000,000 pounds, value \$1,582,396. In 1882, the production was 93,000,000 pounds, value \$1,582,396. In 1881, the production was 93,000,000 pounds, value \$1,582,396. In 1880, the production was 93,000,000 pounds, value \$1,582,396. In 1879, the production was 93,000,000 pounds, value \$1,582,396. In 1878, the production was 93,000,000 pounds, value \$1,582,396. In 1877, the production was 93,000,000 pounds, value \$1,582,396. In 1876, the production was 93,000,000 pounds, value \$1,582,396. In 1875, the production was 93,000,000 pounds, value \$1,582,396. In 1874, the production was 93,000,000 pounds, value \$1,582,396. In 1873, the production was 93,000,000 pounds, value \$1,582,396. In 1872, the production was 93,000,000 pounds, value \$1,582,396. In 1871, the production was 93,000,000 pounds, value \$1,582,396. In 1870, the production was 93,000,000 pounds, value \$1,582,396. In 1869, the production was 93,000,000 pounds, value \$1,582,396. In 1868, the production was 93,000,000 pounds, value \$1,582,396. In 1867, the production was 93,000,000 pounds, value \$1,582,396. In 1866, the production was 93,000,000 pounds, value \$1,582,396. In 1865, the production was 93,000,000 pounds, value \$1,582,396. In 1864, the production was 93,000,000 pounds, value \$1,582,396. In 1863, the production was 93,000,000 pounds, value \$1,582,396. In 1862, the production was 93,000,000 pounds, value \$1,582,396. In 1861, the production was 93,000,000 pounds, value \$1,582,396. In 1860, the production was 93,000,000 pounds, value \$1,582,396. In 1859, the production was 93,000,000 pounds, value \$1,582,396. In 1858, the production was 93,000,000 pounds, value \$1,582,396. In 1857, the production was 93,000,000 pounds, value \$1,582,396. In 1856, the production was 93,000,000 pounds, value \$1,582,396. In 1855, the production was 93,000,000 pounds, value \$1,582,396. In 1854, the production was 93,000,000 pounds, value \$1,582,396. In 1853, the production was 93,000,000 pounds, value \$1,582,396. In 1852, the production was 93,000,000 pounds, value \$1,582,396. In 1851, the production was 93,000,000 pounds, value \$1,582,396. In 1850, the production was 93,000,000 pounds, value \$1,582,396. In 1849, the production was 93,000,000 pounds, value \$1,582,396. In 1848, the production was 93,000,000 pounds, value \$1,582,396. In 1847, the production was 93,000,000 pounds, value \$1,582,396. In 1846, the production was 93,000,000 pounds, value \$1,582,396. In 1845, the production was 93,000,000 pounds, value \$1,582,396. In 1844, the production was 93,000,000 pounds, value \$1,582,396. In 1843, the production was 93,000,000 pounds, value \$1,582,396. In 1842, the production was 93,000,000 pounds, value \$1,582,396. In 1841, the production was 93,000,000 pounds, value \$1,582,396. In 1840, the production was 93,000,000 pounds, value \$1,582,396. In 1839, the production was 93,000,000 pounds, value \$1,582,396. In 1838, the production was 93,000,000 pounds, value \$1,582,396. In 1837, the production was 93,000,000 pounds, value \$1,582,396. In 1836, the production was 93,000,000 pounds, value \$1,582,396. In 1835, the production was 93,000,000 pounds, value \$1,582,396. In 1834, the production was 93,000,000 pounds, value \$1,582,396. In 1833, the production was 93,000,000 pounds, value \$1,582,396. In 1832, the production was 93,000,000 pounds, value \$1,582,396. In 1831, the production was 93,000,000 pounds, value \$1,582,396. In 1830, the production was 93,000,000 pounds, value \$1,582,396. In 1829, the production was 93,000,000 pounds, value \$1,582,396. In 1828, the production was 93,000,000 pounds, value \$1,582,396. In 1827, the production was 93,000,000 pounds, value \$1,582,396. In 1826, the production was 93,000,000 pounds, value \$1,582,396. In 1825, the production was 93,000,000 pounds, value \$1,582,396. In 1824, the production was 93,000,000 pounds, value \$1,582,396. In 1823, the production was 93,000,000 pounds, value \$1,582,396. In 1822, the production was 93,000,000 pounds, value \$1,582,396. In 1821, the production was 93,000,000 pounds, value \$1,582,396. In 1820, the production was 93,000,000 pounds, value \$1,582,396. In 1819, the production was 93,000,000 pounds, value \$1,582,396. In 1818, the production was 93,000,000 pounds, value \$1,582,396. In 1817, the production was 93,000,000 pounds, value \$1,582,396. In 1816, the production was 93,000,000 pounds, value \$1,582,396. In 1815, the production was 93,000,000 pounds, value \$1,582,396. In 1814, the production was 93,000,000 pounds, value \$1,582,396. In 1813, the production was 93,000,000 pounds, value \$1,582,396. In 1812, the production was 93,000,000 pounds, value \$1,582,396. In 1811, the production was 93,000,000 pounds, value \$1,582,396. In 1810, the production was 93,000,000 pounds, value \$1,582,396. In 1809, the production was 93,000,000 pounds, value \$1,582,396. In 1808, the production was 93,000,000 pounds, value \$1,582,396. In 1807, the production was 93,000,000 pounds, value \$1,582,396. In 1806, the production was 93,000,000 pounds, value \$1,582,396. In 1805, the production was 93,000,000 pounds, value \$1,582,396. In 1804, the production was 93,000,000 pounds, value \$1,582,396. In 1803, the production was 93,000,000 pounds, value \$1,582,396. In 1802, the production was 93,000,000 pounds, value \$1,582,396. In 1801, the production was 93,000,000 pounds, value \$1,582,396. In 1800, the production was 93,000,000 pounds, value \$1,582,396. In 1799, the production was 93,000,000 pounds, value \$1,582,396. In 1798, the production was 93,000,000 pounds, value \$1,582,396. In 1797, the production was 93,000,000 pounds, value \$1,582,396. In 1796, the production was 93,000,000 pounds, value \$1,582,396. In 1795, the production was 93,000,000 pounds, value \$1,582,396. In 1794, the production was 93,000,000 pounds, value \$1,582,396. In 1793, the production was 93,000,000 pounds, value \$1,582,396. In 1792, the production was 93,000,000 pounds, value \$1,582,396. In 1791, the production was 93,000,000 pounds, value \$1,582,396. In 1790, the production was 93,000,000 pounds, value \$1,582,396. In 1789, the production was 93,000,000 pounds, value \$1,582,396. In 1788, the production was 93,000,000 pounds, value \$1,582,396. In 1787, the production was 93,000,000 pounds, value \$1,582,396. In 1786, the production was 93,000,000 pounds, value \$1,582,396. In 1785, the production was 93,000,000 pounds, value \$1,582,396. In 1784, the production was 93,000,000 pounds, value \$1,582,396. In 1783, the production was 93,000,000 pounds, value \$1,582,396. In 1782, the production was 93,000,000 pounds, value \$1,582,396. In 1781, the production was 93,000,000 pounds, value \$1,582,396. In 1780, the production was 93,000,000 pounds, value \$1,582,396. In 1779, the production was 93,000,000 pounds, value \$1,582,396. In 1778, the production was 93,000,000 pounds, value \$1,582,396. In 1777, the production was 93,000,000 pounds, value \$1,582,396. In 1776, the production was 93,000,000 pounds, value \$1,582,396. In 1775, the production was 93,000,000 pounds, value \$1,582,396. In 1774, the production was 93,000,000 pounds, value \$1,582,396. In 1773, the production was 93,000,000 pounds, value \$1,582,396. In 1772, the production was 93,000,000 pounds, value \$1,582,396. In 1771, the production was 93,000,000 pounds, value \$1,582,396. In 1770, the production was 93,000,000 pounds, value \$1,582,396. In 1769, the production was 93,000,000 pounds, value \$1,582,396. In 1768, the production was 93,000,000 pounds, value \$1,582,396. In 1767, the production was 93,000,000 pounds, value \$1,582,396. In 1766, the production was 93,000,000 pounds, value \$1,582,396. In 1765, the production was 93,000,000 pounds, value \$1,582,396. In 1764, the production was 93,000,000 pounds, value \$1,582,396. In 1763, the production was 93,000,000 pounds, value \$1,582,396. In 1762, the production was 93,000,000 pounds, value \$1,582,396. In 1761, the production was 93,000,000 pounds, value \$1,582,396. In 1760, the production was 93,000,000 pounds, value \$1,582,396. In 1759, the production was 93,000,000 pounds, value \$1,582,396. In 1758, the production was 93,000,000 pounds, value \$1,582,396. In 1757, the production was 93,000,000 pounds, value \$1,582,396. In 1756, the production was 93,000,000 pounds, value \$1,582,396. In 1755, the production was 93,000,000 pounds, value \$1,582,396. In 1754, the production was 93,000,000 pounds, value \$1,582,396. In 1753, the production was 93,000,000 pounds, value \$1,582,396. In 1752, the production was 93,000,000 pounds, value \$1,582,396. In 1751, the production was 93,000,000 pounds, value \$1,582,396. In 1750, the production was 93,000,000 pounds, value \$1,582,396. In 1749, the production was 93,000,000 pounds, value \$1,582,396. In 1748, the production was 93,000,000 pounds, value \$1,582,396. In 1747, the production was 93,000,000 pounds, value \$1,582,396. In 1746, the production was 93,000,000 pounds, value \$1,582,396. In 1745, the production was 93,000,000 pounds, value \$1,582,396. In 1744, the production was 93,000,000 pounds, value \$1,582,396. In 1743, the production was 93,000,000 pounds, value \$1,582,396. In 1742, the production was 93,000,000 pounds, value \$1,582,396. In 1741, the production was 93,000,000 pounds, value \$1,582,396. In 1740, the production was 93,000,000 pounds, value \$1,582,396. In 1739, the production was 93,000,000 pounds, value \$1,582,396. In 1738, the production was 93,000,000 pounds, value \$1,582,396. In 1737, the production was 93,000,000 pounds, value \$1,582,396. In 1736, the production was 93,000,000 pounds, value \$1,582,396. In 1735, the production was 93,000,000 pounds, value \$1,582,396. In 1734, the production was 93,000,000 pounds, value \$1,582,396. In 1733, the production was 93,000,000 pounds, value \$1,582,396. In 1732, the production was 93,000,000 pounds, value \$1,582,396. In 1731, the production was 93,000,000 pounds, value \$1,582,396. In 1730, the production was 93,000,000 pounds, value \$1,582,396. In 1729, the production was 93,000,000 pounds, value \$1,582,396. In 1728, the production was 93,000,000 pounds, value \$1,582,396. In 1727, the production was 93,000,000 pounds, value \$1,582,396. In 1726, the production was 93,000,000 pounds, value \$1,582,396. In 1725, the production was 93,000,000 pounds, value \$1,582,396. In 1724, the production was 93,000,000 pounds, value \$1,582,396. In 1723, the production was 93,000,000 pounds, value \$1,582,396. In 1722, the production was 93,000,000 pounds, value \$1,582,396. In 1721, the production was 93,000,000 pounds, value \$1,582,396. In 1720, the production was 93,000,000 pounds, value \$1,582,396. In 1719, the production was 93,000,000 pounds, value \$1,582,396. In 1718, the production was 93,000,000 pounds, value \$1,582,396. In 1717, the production was 93,000,000 pounds, value \$1,582,396. In 1716, the production was 93,000,000 pounds, value \$1,582,396. In 1715, the production was 93,000,000 pounds, value \$1,582,396. In 1714, the production was 93,000,000 pounds, value \$1,582,396. In 1713, the production was 93,000,000 pounds, value \$1,582,396. In 1712, the production was 93,000,000 pounds, value \$1,582,396. In 1711, the production was 93,000,000 pounds, value \$1,582,396. In 1710, the production was 93,000,000 pounds, value \$1,582,396. In 1709, the production was 93,000,000 pounds, value \$1,582,396. In 1708, the production was 93,000,000 pounds, value \$1,582,396. In 1707, the production was 93,000,000 pounds, value \$1,582,396. In 1706, the production was 93,000,000 pounds, value \$1,582,396. In 1705, the production was 93,000,000 pounds, value \$1,582,396. In 1704, the production was 93,000,000 pounds, value \$1,582,396. In 1703, the production was 93,000,000 pounds, value \$1,582,396. In 1702, the production was 93,000,000 pounds, value \$1,582,396. In 1701, the production was 93,000,000 pounds, value \$1,582,396. In 1700, the production was 93,000,000 pounds, value \$1,582,396. In 1699,

Mr. Geo. Putnam, Superintendent of Women's Institutes, gave an interesting report of the Standing Committee on Education and Better Schools. The work of this committee was largely confined to investigations of the edu-

The condition of the food when placed in storage is of much greater importance than the condition when taken out. There is now before the

present a solid front against iniquity in every form. Let us fight this battle on our knees, God alone through us and in us can conquer, we are His instruments, His messengers. Let:

ponderance of bearish sentiment. banking circles, however, relief was felt that many stock holdings had passed from weak to strong hands. To that extent, it was added the market

STILL SILENT

At the first glance a flamingo's jaws appear to be badly broken, for nothing of its kind has ever been seen in the

on of A.E.F.

Washington Nov. 11. — Discussions have taken place between members of Canadian employer groups at the International Lab-

When the flamingo dines he rests his head in the mud on the bottom of a shallow stream, and while he strains the bugs out of the water he can secure both a backward and upside down view of the

garded as being of great consequence to the Canadian position.

The legs of the flamingo are absurdly long and thin and he looks very awkward when he is pacing sedately along on land, but when he wants to go far out into deep water hunting for choice bits to eat he finds his stilts most con-

So far American employers have sent no representative to the International Conference, although representative of the National A

then so persistently and were more easy of approach, so that he had an opportunity to study them at close range. They build their nests in shallow ponds where there is much mud. This they scrape together, making little hillocks, like small islands, appearing out of the covering of silt and mud. The caterpillar covered moth. In a few days, it deposits its 300 or so eggs. The caterpillar speedily dies. And so the process begins all over again.

president of the American Federation of Labor, was in attendance on behalf of the American workers; voted, but his vote was not counted on the ground that no representative of American employers had been a

feet on the ground and in the water, resting their bodies on the hillock and covering the hollow nest upon it with their plumage. For their legs are very long and building thus, as they do, up on the ground, they could neither draw their legs conveniently into their nest nor sit

The special committee on the hour week began its deliberations this afternoon. But some days must necessarily elapse before the committee is able to lay any concrete proposals before conference. Each of the

The flamingo frequents salt marshes and when these become dry will go long distances to find others. On the wing they are positively startling and look far more like great flaming sky rockets hurtling across the sky than the elegant birds seen on the ground. The flamingo does not lose its brilliant plumage much of the natural ground color is not removed from its sunbaked feathers would weaken the already delicate thread; that the dried properly, so that

It is the lack of order which makes us slaves, the confusion of to-day

confusion. The males ambled about as though trying to show off their lovely plumage, for the flamingo is as vain as a peacock of his scarlet jacket. Then each went to his own little home and standing gravely on one foot beside his mate seemed to be discussing the weather with her.

must always leave place and go on

When one of these great birds took a nap he curled up his long neck like a pine which comes by the end of human living - Ph

DO YOU REALIZE?

\$100 in Victory Bonds Brings You More Interest Than \$175 in the Bank

LET US LOOK INTO THIS CLOSELY:

Suppose you have \$1,833.33 in the bank;
annual interest at 3% amounts to . . . \$55.00

Suppose you put \$1,000 in Victory Bonds;
annual interest at 5½% amounts to . . . \$55.00

Suppose you buy another \$500 Victory
Bond; annual interest at 5½% amounts to \$27.50

Suppose you buy three more \$100 Victory
Bonds; annual interest at 5½% amounts to \$16.50

That leaves \$33.33 still in the bank; annual
interest at 3% amounts to \$ 1.00

Now! Look at the interest your money
brings \$100.00

Can any citizen of Hamilton
